

Tech Rider

JAYKO

The technical rider is part of the contract and should be met to ensure a great show.

Output	Signal	Cable
1	Mono Mix — Tone Master Pro	XLR

Management Contact

Person: Jayko

Email: jayko@jaykomusic.com

Phone: 1(608)415-9902

PA System:

JAYKO requires a sufficiently dimensioned and professional PA system. His dynamic sound requires a PA system capable of producing low frequencies —some of the instruments hit frequencies down to 40Hz. In other words, PA needs powered mains and sub woofer(s). Artist requires a guidance level of 100db(A) (with 6db headroom) at the FoH and consistent frequency response between 30 to 18000Hz with equal levels at all audience areas including front fills / balcony fills if appropriate. Sufficient power (120V / 20A duplex outlet) must be easily accessible from side stage right.

Monitors:

JAYKO uses an In-Ear Monitoring rig. No floor wedges required.

IMPORTANT please clear stage of monitors so they don't obstruct footwork.

FoH:

JAYKO uses an ampless, IEM, backing track rig. Guitar is DI'd into his mixer; vocals run through a wireless handheld into the same rig. Venue provides one (1) XLR cable from stage right to FoH, connecting to JAYKO's Tone Master Pro output. Minimal change over time.
