

JAYKO

Stage Plot

P.A.

JAYKO requires a sufficiently dimensioned and professional PA-system. His dynamic sound requires a PA-system capable of producing low frequencies. Some of the instruments provide frequencies down to 40Hz.

JAYKO requires a guidance level of 100db(A) (with 6db headroom) at the FoH and consistent frequency response between 30 to 18000Hz with equal levels at all audience areas including front fills /

balcony fills if appropriate.

DSP reverb plugins –preferably Plate– for vocals. No slap back echo or delay.

Monitors

JAYKO needs 4 separate floor monitors (min. 10”) on 4 auxiliary channels with adequate amplification and separate 31-band EQ.

JAYKO

Tech Rider

Channel	Instrument * = Provided by JAYKO	Mic / DI	Stand / Cables
1	* Kick (Out)	Beta 52A	Short Boom
2	* Snare (Top)	SM57	Boom

Additional Info

This is an overview for our technical requirements.

If there are any problems or questions, please contact JAYKO in a timely manner.

The technical rider is part of the contract and should be met to enable us all to have a good show.

The mics listed are recommended mics we usually use, but suitable substitutions are perfectly fine.

The musician roster changes for JAYKO's backing band, thus the equipment preferences are subject to change.
